Believe in Quality

Manufacturer of All Types of
Steel Shots & Grits

www.steefeindustries.com

We Are

We are one of few names to offer a vast and qualitative range of industrial steel abrasive products. Committed to follow fair business practices, we have earned the desired goodwill in the market.

We also maintain cordial relationships with our esteemed clients. We are manufacturing these abrasives as per the international & other industry recommended standards. Some of the features of steel shot are durability, resistance to impact fatigue and maximum cleaning efficiency. We are offering these abrasives at economical price in the market.

We use quality material from reliable sources and before being used in the production process, it undergoes strict quality inspection by our team of quality controllers.

Quality Assurance

We are highly acclaimed name to offer a qualitative range of industrial steel abrasive products. Relying on the prudent vendors for high-grade raw materials, we ensure the premium quality of the entire range of the products offered.

- Density
- Physical and chemical properties
- Micro Structure
- Hardness
- Durability
- Crack Resistance
- Dimensional Accuracy

We have been a preferred choice of our revered clients for following reasons:

- Optimum Quality
- Free Stamping
- Timely Delivery
- Customization
- Wide Distribution Network
- Advanced Technological Process
- Pro Technical Machinery
- Quality Control

STEEL SHOTS

Steel shots are spherical grains made of molten steel through an atomization (granulation) process; these cast steel shots are available in different sizes & hardness. Steel shots are manufactured from steel scrap. Our furnace is electric furnace. Steel scrap is melted in the furnace then being atomized into shot by water jet.

Steel shot blasting is the most widely used process in sand & shot blasting industries for cleaning, stripping and improving a metal surface. The grade or size of steel shots will determine the finish achieved on the surface of the metal in Shot Blasting process.

TABLE OF VARIOUS DIAMETERS
OF CAST STEEL SHOTS

GRADE	SIZE - MM
S-930	2.4
S-780	2.0
S-660	1.7
S-550	1.4
S-460	1.2
S-390	1.0
S-330	0.850
S-280	0.700
S-230	0.600
S-170	0.425
S-110	0.300
S-70	0.180

STEEL GRIT

Steel Grit are spherical grains made of molten steel through an atomization (granulation) process; these cast steel Grit are available in different sizes & hardness. Steel Grit are manufactured from steel scrap. Our furnace is electric furnace. Steel scrap is melted in the furnace then being atomized into shot by water jet.

We are one of the few names to offer a vast and qualitative range of industrial steel abrasive products. Committed to follow fair business practices, we have earned the desired goodwill in the MARKET. Owing to the dexterous team, state-of-the-art infrastructure, and the quality we offer, we have accomplished in attaining the maximum satisfaction and trust of our esteemed clients.

TABLE OF VARIOUS DIAMETERS
OF CAST STEEL GRIT

GRADE	SAE NO.	SIZE - MM
G - 0	G-80	0.180
G - 1	G-50	0.300
G - 2	G-40	0.425
G - 4	G-25	0.710
G - 6	G-18	1.00
G - 7	G-16	1.18
G - 8	G-14	1.40
G - 9	G-12	1.70
G-10	G-10	2.00

“Believe in Quality”

We are achieving **customers**
trust by
delivering a **precious**
&
quality products
